

Because **Math is the Path** to STEM success...

Become a UA Math Problem-Solving (PS) Scholar

Are you in Math 122A/B or Math 120R?

Are you a Community College transfer or a First-Generation STEM major?

If so you may qualify join the **UA Math Problem-Solving Scholars** program, a project and research study sponsored by the National Science Foundation (NSF).

Why become a Math PS Scholar?

- ▶ Scholars get 2 weekly hours of dedicated, small group training in mathematical problem-solving
- ▶ Scholars get experience in doing math effectively with peers
- ▶ Scholars have dedicated time to meet and interact with experienced faculty mentors
- ▶ Scholars' participation in this research study will improve the effectiveness of the problem-solving course for future students.

The UA Math PS Scholars Program is a project and research study sponsored by the National Science Foundation (NSF) to improve STEM performance and persistence. An Institutional Review Board at the University of Arizona has reviewed and approved this project/study.

If you complete the Math PS Scholar program what will you receive?

- ▶ A certificate of completion, stating you completed all Math PS Scholar requirements
- ▶ A \$200 successful completion stipend

"The class I took helped me so much in my math course; it was engaging, and fun. The mentor session led me to consider internship opportunities I was not aware of. I would definitely participate in this program again!"
